

## Labelling the parts of the eye

### Optic nerve

This is at the back of the eye and looks like wires connected to the brain.

### Sclera

This is the name for the tough coating around the outside of the eye.

### Iris

This is the coloured part of the eye. It has the pupil in the middle of it.

### Pupil

The hole in the centre of the iris.

### Cornea

This covers the iris and the pupil at the front of the eye.

### Retina

The part at the back of the eye.

### Lens

Like a window near the front of the eye.
